[www.acttechnico.com](http://www.acttechnico.com)**SA series AppliPak**

The SA series of ShuttleStor AppliPaks from ACT/Technico offers a powerful combination of either a PowerPC or Pentium-based, pre-integrated and tested SBC and storage solution, including drivers and a board support package. It combines the processing power of a Pentium- or PowerPC-based, 6U single-slot SBC with front-panel, hot-swap removable PMC storage. This results in a high-performance package that offers scalability, security, flexibility, and availability unmatched in the embedded computing industry. The SA series ShuttleStor AppliPaks can be ruggedized and tested as a bundle under the application load to meet specific system demands. Options include solid-state and enhanced duty drives, conformal coating, and environmental screening.

**FEATURES:**

- Cutting edge SBC with VME64x/VITA 31.1 AND 2eSST built around a PowerPC e600 (MPC7447/7448) processor
- Up to two PMC ShuttleStor removable storage units for peak capability
- A fully tested, pre-integrated solution complete with:
  - Hot-swap and non-hot-swap device driver support in VxWorks, Linux, and Windows
  - Board support packages for VxWorks and Linux operating systems
  - Up to one 2.5" hard drive and one 1.8" hard drive – rotating or solid-state for rugged applications
